Borjon, his grandniece, is quite proud of her famous uncle. Following in his footsteps, she has become one of the best scout 'Mech pilots in the Triarii Protectors, but despite heaps of praise from her commanding officers, Borjon is quite humble, stating simply that she merely serves The Republic as her uncle would.

FACTION: Republic of the Sphere **DOB:** 11/12/3106
HAIR: Red
REGIMENT: Triarii Protectors **EYES:** Hazel
'MECH: Locust

Irena Borjon hails from Dubhe, one of the few worlds in The Republic to be home to a sizable Rasalhaguean population. Though history books play down the role of the Free Rasalhague Republic, the short-lived and decimated realm did indeed take part in the coalition effort to destroy the Blakist fanatics, often fighting alongside ComStar forces during the Jihad. Among these brave warriors, who then followed Devlin Stone in the creation of The Republic of the Sphere, was Kaptan Lars Borjon of the Second Freemen, whose recon company helped to liberate New Earth. LI-138-02 

The classic *Locust* design has been around since the time of the Star League, well known for its speed and often deployed as a forward scout unit or as part of a "swarm" tactic. One of the fastest and cheapest designs to survive the Succession Wars, this 'Mech became all the more dangerous with the discovery of lost technologies in the mid-31st century. The model piloted by Irena Borjon features a powerful array of close-range lasers and can run nearly 200 kilometers per hour. This mix of speed and firepower made this version series truly fearsome, especially when operating in swarms to take down heavier 'Mechs.

Borjon, who has named her *Locust* "Unchained Fury" (a vague reference to her uncle's old command), uses every millimeter of speed she can squeeze out of her 'Mech during battle, sowing confusion and paranoia in the enemy's ranks while simultaneously dodging any hostile fire.

MECH: LOCUST
